ICT Application Specialist

Faculty Lead – Mr C Gee

The purpose of the qualification is to build on existing IT user skills in the efficient use of technology to improve your productivity and work in other subject areas. Anyone that wants to learn how to use digital technology tools efficiently to support their work, whether it is at school, at home or at work should chose this qualification. This qualification will provide a basis for any other higher level qualification in the digital technology domain and is especially designed to underpin transition to higher level digital technology based qualifications at level 3 both in the user and practitioner sectors. You should study this if you are interested in improving your productivity in other subjects or at work.
